137850

TABLE OF CONTENTS

		PAGE
Responses of plants to the herbicide 3-(*p*-chlorophenyl)-1,1-dimethylurea (CMU)	*Roy J. Christoph and Emma L. Fisk*	1– 14
Photoperiodic responses of hemp	*H. A. Borthwick and N. J. Scully*	14– 29
Some effects of certain plant growth substances on maize	*H. W. Gausman and G. H. Dungan*	29– 40
Anatomical structure of the alfalfa flower and an explanation of the tripping mechanism	*R. A. Larkin and H. O. Graumann*	40– 52
Some effects of zinc deficiency on the anatomy of the tomato	*William M. Carlton*	52– 64
Studies on the absorption, translocation, and action of CMU	*T. J. Muzik, H. J. Cruzado, and A. J. Loustalot*	65– 73
Preliminary study of the penetration of sodium arsenite and sodium monochloroacetate solutions into trunks of yellow birch and red spruce	*Hugh Wilcox*	73– 81
Effects of variables in weather and their interactions on metaphase cells in root tips of grasses	*Helen D. Hill and H. L. Carnahan*	82– 86
Glutamic acid decarboxylase of squash and radish	*S. L. Hood*	86– 92
Chromosome number and behavior in arctic mosses	*William C. Steere*	93–133
Effect of darkness and indoleacetic acid following exposure to short day on the floral response of *Xanthium*, a short-day plant	*James A. Lockhart and Karl C. Hamner*	133–142
Characteristics and movement of the flowering stimulus from the induced leaf of *Xanthium*	*John Skok and Norbert J. Scully*	142–147
Effects of maleic hydrazide and 2,4-dichlorophenoxyacetic acid on the free amino acids in sugar beets	*Clark Livingston, Merle G. Payne, and Jess L. Fults*	148–156
Effect of sucrose concentration, length of passage, minor element nutrition, and pH value on growth of excised tomato roots	*William G. Boll*	156–162
Cytological investigations in *Mammillaria* and some associated genera	*Sister Marie Fidelis Remski, I.H.M.*	163–171

Response of sugar-cane cuttings to auxin treatment as modified by other applied compounds	*M. A. Khan and W. C. Hall*	172–183
A quantitative paper-chromatographic study of the amino acid composition of proteins and juice of the orange	*Randolph T. Wedding and Walton B. Sinclair*	183–188
Pollen production and seed development in the white sapote	*Margaret J. Mustard*	189–192
Response of certain plant species to an acrylic acid derivative	*R. E. Hay and D. P. Uhl*	193–195
Infection of cockroaches with *Herpomyces* (Laboulbeniales). III. Experimental studies on host specificity	*A. Glenn Richards and Myrtle N. Smith*	195–198
The cotyledon in relation to photoperiodism in cocklebur	*Peter R. Jennings and Robert K. Zuck*	199–200
Influence of sodium bicarbonate on the growth and chlorosis of garden beets	*J. W. Brown and C. H. Wadleigh*	201–209
The mechanism of apomixis in *Pennisetum ciliare*	*L. A. Snyder, Alice R. Hernandez, and H. E. Warmke*	209–221
Regeneration of injured root systems in noble fir	*Hugh Wilcox*	221–234
An embryological study in the *Rhododendron* subgenus Anthodendron Endl.	*John L. Creech*	234–243
Megagametophyte development in *Chrysanthemum leucanthemum* L.	*Richard W. Martin and Frank H. Smith*	243–249
Occurrence of antimicrobial substances in chlorophyllose plants growing in Florida. II	*Anne L. Paies and Grace C. Madsen*	250–261
Effects of temperature on the immobilization of 2,4-dichlorophenoxyacetic acid in bean leaves in darkness	*Elroy L. Rice and Lawrence M. Rohrbaugh*	261–266
Use of benzothiazol-2-oxyacetic acid to delay maturity of grapes	*Robert J. Weaver*	266–273
Influence of temperature and daylength on growth and sugar content of sugar cane following auxin treatment of cuttings	*W. C. Hall and M. A. Khan*	274–281
Effect of cathode rays on germination and early growth of wheat	*L. H. Soderholm and Elda R. Walker*	281–290
A method for procuring large numbers of soil-free root tips	*Paul F. Romberg*	291
A pseudomonofolious sand pine	*Frank W. Woods and Charles D. Dawsey*	292

Cytological disturbances influencing fertility in *Bromus inermis* . . . . . *Ellar L. Nielsen* 293–305

Comparative anatomical effects of the curly-top and aster-yellows viruses on the flax plant . . . . . *Guido Girolami* 305–322

Studies on the growth and development and morphine content of opium poppy . . . . . *Edward S. Mika* 323–339

Virgin hemlock forest segregates in the Joyce Kilmer Memorial Forest of western North Carolina . . . . *Henry J. Oosting and Philippe F. Bourdeau* 340–359

Growth in culture of excised portions of lupine embryos *Addison E. Lee* 359–364

Potentially unlimited growth of lupine callus . . . *Addison E. Lee* 364–368

Cytogenetics of *Sorghum*. I. The orientation of interchange complexes and quadrivalents at metaphase I in *S. purpureo-sericeum* . . . . . *E. D. Garber* 369–372

Index 373–377
